INSTALLATION MANUAL FOR QGIS

The QGIS logo is displayed in a large, bold, green font. The letter 'Q' is stylized with a 3D effect, featuring a green cube with an orange top face and a yellow side face, and a green rectangular prism extending from the bottom right. The letters 'GIS' are in a solid green font. A vertical blue line with square endpoints is positioned to the left of the logo.

QGIS

What is QGIS?

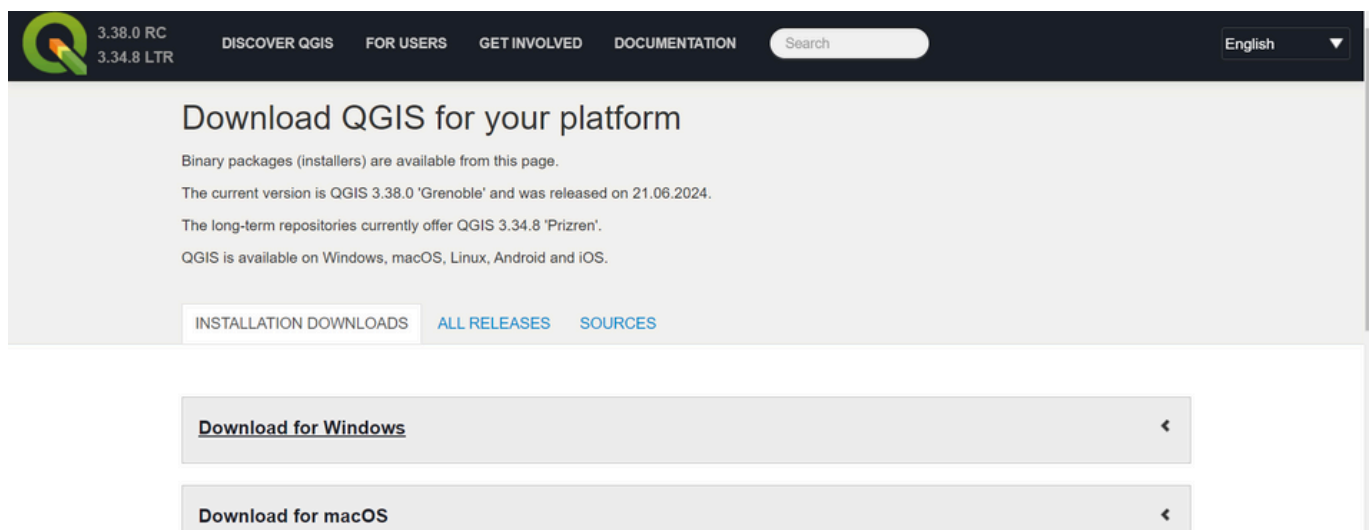

Just as we use a word processor to write documents and deal with words on a computer, we can use a GIS application to deal with spatial information on a computer. GIS stands for 'Geographical Information System'.

A GIS consists of:

- **Digital Data** — the geographical information that you will view and analyse using computer hardware and software.
- **Computer Hardware** — computers used for storing data, displaying graphics and processing data.
- **Computer Software** — computer programs that run on the computer hardware and allow you to work with digital data. A software program that forms part of the GIS is called a GIS Application.

Installation Link

[Click here to install QGIS](#)

It will redirect you to this page

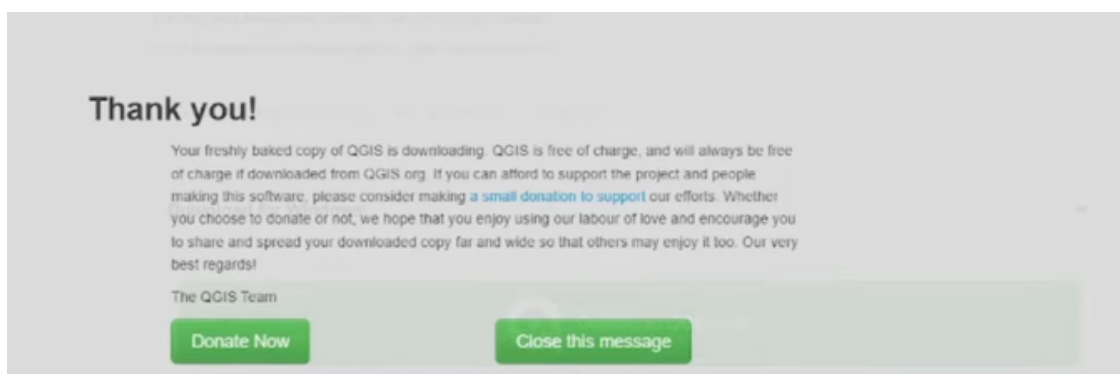

Scroll down to see different installation options

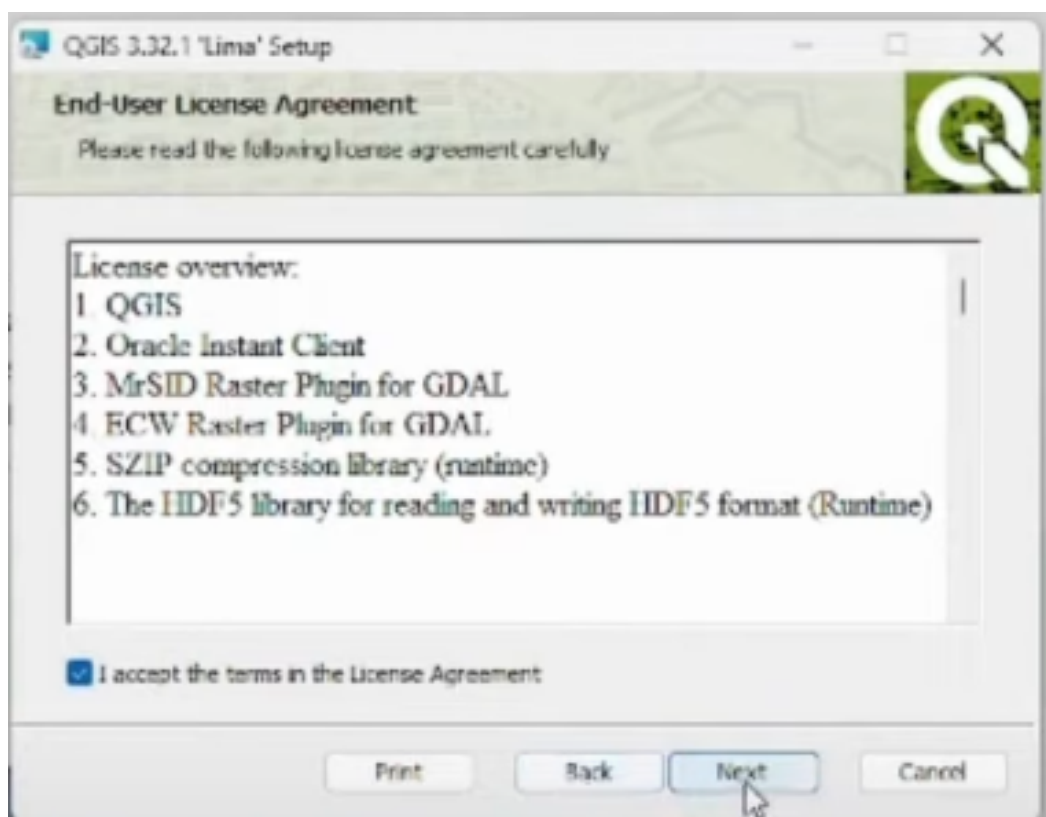

Click on Download QGIS button

You will see this message

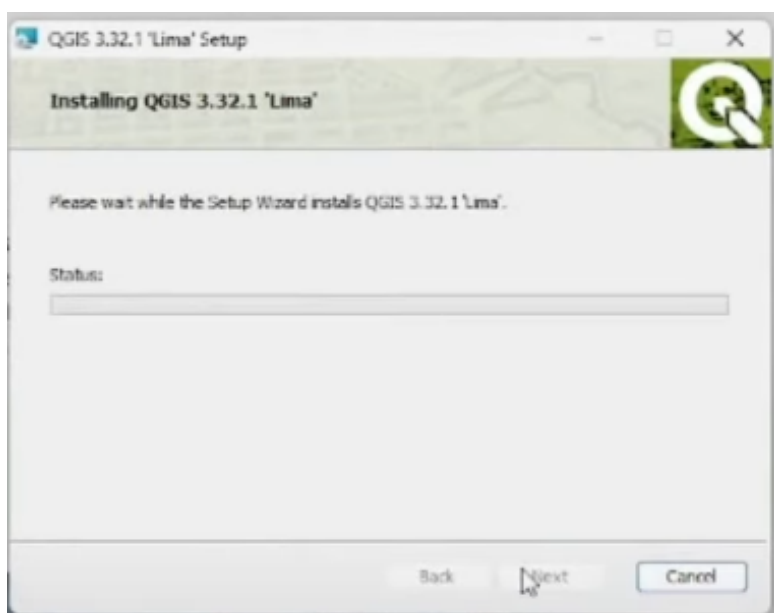

Select the destination for your file

Click on Install

Installation will begin

Open the application from the saved destination

This window will pop up when the application is accessed
